

RGIS U Count Equipment List

RGIS

U COUNT

Bluebird VF550 Rugged Handheld Computer

This device is used to run the U Count Counter app which captures, stores and transmits the inventory data.

Samsung Galaxy A9+ Tablet

This device is used to access the RGIS NGEN Web-UI system and run the events.

RGIS Patented Figure Laser

This device is used to scan barcodes and enter quantities of the stock as it is captured by the user – connects to the VF550 or other data capture device.

TP-Link Deco X50-4G Access Point

This device is used to link the tablets and the VF550s to a mobile data connection – devices must be connected to a live connection to work correctly.

SABRENT Powered USB Hub, 16 Port 90W USB 3.2x1 Docking Station

This device is used to charge the VF550, Figure Lasers and tablets via their respective cables.
